

## Estate & woodland management

Woodlands of all sizes require management to ensure their continuing health and to maximise their timber value and benefits to flora and fauna. We can provide a long term management service to estates and woodland owners.

We currently manage all the Woodland Trust woods in Surrey and Hampshire on a long term basis. Working with you we can draw up a management plan detailing required work over a 1, 5, 10 or 20 year period. Once agreed we carry out the work without you needing to worry about it.

We can advise and apply for relevant grants and licences and negotiate on your behalf. Work can consist of timber harvesting or thinning work, ride creation, planting, fencing, footpaths to simple jobs like ride cutting or litter picking. The package is drawn up to meet your specific needs. In some instances the cost of drawing up a detailed management plan can be grant aided

### Professional advice & reports

As well as the above we are happy to advise on particular issues on a one off basis. These may be tree safety or woodland reports, timber harvesting, tree planting, hedge planting, deer management, spraying regimes, grant aid, roading etc. We also act as expert witnesses on such matters as tree reports, tree damage, illegal felling, tree and woodland related accidents etc.

### Woodland valuations

If you are planning to buy a woodland we can visit and advise on a suitable valuation price and any work that may be required or visit your existing woodland and value timber stock and advise on a likely sales price. We can also provide a quote to carry out required work pre or post sale.
