

Site Clearance

We can arrange for sites to be cleared of any vegetation whether it is woodland infested with Rhododendron or a field or paddock overgrown with brambles, nettles and young saplings. In some cases removal of Rhododendron or other invasive weed species may be eligible for grant aid. We can also remove tree stumps from any location. Burning is becoming less acceptable and, in many cases, impractical. We have a range of machinery available that can eliminate the need to burn from chippers and mulchers to excavators to carry out the work as effectively and economically as possible.
